

Renvooi Elektrische installatie																																																						
Symbool	Omschrijving	Hoogte																																																				
	Centraaldoos	In Plafond																																																				
	Enkelpolige Schakelaar	1050+																																																				
	Wissel Schakelaar	1050+																																																				
	Serie Schakelaar	1050+																																																				
	Werkshakelaar	-																																																				
	Enkele Wandcontactdoos	1050+																																																				
	Compact Wandcontactdoos	300+																																																				
	Loze Aansluiting	300+																																																				
	Vaste Voeding 230V	1500+																																																				
	Perilex (2x230V)	via vloer																																																				
	Groepenkast - ABB HAF	o.k. 1600+																																																				
	Rookmelder	Tegen Plafond																																																				
	Wandaansluitpunt t.b.v. Verlichting	1900+																																																				
	Beldrukker - Dimex D824	1200+																																																				
	Schel - Minibuzzer D182	Boven Deur																																																				
	Aarding vloer (via bovenwapening of aardmat)	In Vloer																																																				
	Videofoon	-
